1. Qualitative Information on Quarterly Financial Results

(1) Explanation of Operating Results

On January 22, 2024, we made an announcement of incidents of impropriety regarding extra-high-voltage transformer products ("the Incidents")*1.

We identified the Incidents in the course of performing the total quality inspection for all products of the Company following the announcement of incidents of impropriety regarding certain instrument transformer products made in May 2023.

We would like to once again express our deepest apologies to our customers and other stakeholders for any inconvenience and concern these repeated incidents of impropriety may have caused.

In view of the gravity of the Incidents, we established an independent investigation and verification committee on January 22, 2024. The committee has no vested interest in the Company, and we have delegated three tasks to it: 1. Investigation into the Incidents; 2. Causal analysis and proposal of recurrence prevention measures based on the investigation findings of the Incidents; and 3. Evaluation and verification of the processes of the comprehensive investigation and other measures taken by the Company.

We will offer all-out cooperation to investigations by the investigation and verification committee. We will also continue with comprehensive inspections to identify the true causes of the series of incidents of impropriety and ensure the thorough implementation of recurrence prevention measures while doing all in our power to regain our customers' trust by striving to further strengthen the compliance systems across the entire Group.

*1: Published on the Company's website: https://ssl4.eir-parts.net/doc/6617/tdnet/2382637/00.pdf (available in Japanese)

We also announced the cancellation of ISO 9001 certification on December 5, 2023*2. Since the temporary suspension of ISO 9001, announced on June 16, 2023*3, we formulated and implemented a correction plan for this case and underwent an ad hoc examination by the Electrical Safety and Environment Laboratory (JET), ISO's registered certification organization. We then received an assessment that the temporary suspension cancellation condition was satisfied. However, as the total quality inspection for all products other than certain instrument transformer products was ongoing, we continued the temporary suspension. Since the certification was to expire on December 5, 2023, we received a notice of cancellation of the certification from JET. We will continue to strive to regain the trust of our customers through the total quality inspection and thorough implementation of preventive measures, and we will do our utmost to quickly reacquire such certification.

Regarding the overall situation for the Group, the business environment is changing significantly and becoming increasingly severe in the electric power industry, which is our largest customer. Global fuel prices have risen rapidly and competition has further intensified in the retail business amid growing demands for realizing carbon neutrality, ensuring stable electricity supply and demand, strengthening disaster prevention functions and resilience within local communities, and a revenue cap system—a new system for wheeling charges. Against this background, companies in the industry are working to improve productivity and thoroughly reduce business costs. Meanwhile, the Japanese government has declared its intention to become carbon neutral by 2050 as part of its efforts to realize a decarbonized society. In Japan, that has encouraged the further spread of distributed energy-related equipment, including renewable energy, and there are signs of nascent demand for fast chargers for electric vehicles.

Meanwhile, in April 2021, the Group formulated its 2030 VISION and Medium-term Management Plan 2023. Based on the three pillar policies of deepening and transforming our core businesses, transforming the structure of our business foundations, and taking on challenges to cultivate the future vision for 2030, we have

started pursuing an ambidextrous management style that strives to simultaneously transform existing businesses and develop new businesses, in order to achieve our 2030 VISION.

As announced on December 22, 2023, during the third quarter under review, we identified our materiality; key issues that we should address on a priority basis to realize a sustainable society and achieve sustainable enhancement of corporate value.

Prior to the identification of materiality, we formulated the Basic Policy on Sustainability*4, as announced on December 27, 2021.

Our basic policy on sustainability is to implement the TAKAOKA TOKO Group Charter of Corporate Behavior, which was formulated with the aim of achieving sustainable growth in cooperation with society while fulfilling the two-fold mission of "unchanging mission" and "new mission." In accordance with this basic policy, we are working on various sustainability issues.

As we advance these initiatives, we identified material issues that we should address on a priority basis, in an effort to further deepen coordination between our management strategies and initiatives taken in line with the Basic Policy on Sustainability, while seeking to realize a sustainable society and sustainably enhance corporate value. We also determined what we want our company to be over the long term when we will have successfully addressed our materiality.

To identify materiality, we selected sustainability issues based on the value creation process and management policies that we have taken stock of, as well as mega industry trends and external environments that can affect our business. Then, we assessed the importance of each issue and held repeated rounds of discussions among management and others, until we identified our materiality below. For details, please see the announcement made on December 22, 2023*5.

- Contribution to stable supply and advanced use of electricity
- Contribution to realization of carbon neutrality
- Creation of an organization where diverse people are motivated to co-create and keep challenging themselves
- Stakeholder engagement
- Ensuring of safety, quality, compliance, and enhancement of governance

Currently, our Sustainability Committee, which was established on September 25, 2023 to further strengthen the sustainability management promotion system, is working on concrete numerical targets and initiatives, which will be disclosed once they are fixed.

At the end of March 2023, the Tokyo Stock Exchange issued a notice titled, "Action to Implement Management that is Conscious of Cost of Capital and Stock Price." The situation for the Company with regard to this as of March 31, 2023 was as follows: ROE = 5.5%; PBR = 0.7x. The stock price, ROE and PBR has been on an improving trend relative to March 31, 2019 (ROE = 2.1%; PBR = 0.4x); however, they fall short of the standards detailed in the aforementioned notice and we fully acknowledge that there are still issues.

Going forward, we will begin by analyzing the current situation with reference to the content of the above notice (form an accurate understanding of the Company's capital costs and returns on capital, and analyze and evaluate the current situation with regard to this and the market evaluation at meetings of the Board of Directors), then formulate and disclose our plans.

As part of these efforts, we are analyzing metrics and identifying issues on a by business-segment or by model level, to improve initiatives focused on ROIC metrics toward the realization of business management and operations that take into account capital costs and return on capital.

Furthermore, in order to improve ROS, we will accelerate kaizen and DX initiatives while also engaging in

structural reforms of existing core businesses (selection and centralization, reform of supply chains, reshuffling of production bases, etc.), formulating takeoff strategies for new businesses, investing in growth, and creating intangible assets through investment in human resource and R&D. Each of these shall be disclosed in the form of easy-to-follow growth stories and we will actively work on improving dialogue with our investors.

On "6. Action to Implement Management That is Conscious of Cost of Capital and Stock Price" of the FY2023 Second Quarter Supplementary Briefing Material on Financial Results*6, which was published on November 10, 2023, we provide findings of the current state analysis of our ROE (a perception about the current status and an example action) by breaking it down by such elements as profitability, capital efficiency, and financial soundness. To view the material, please visit the Company's website.

*6: Published on the Company's website: https://ssl4.eir-parts.net/doc/6617/ir_material_for_fiscal_ym1/144533/00.pdf (available in Japanese)

Despite a decline in sales for general plant projects and 3D inspection systems, net sales for the nine months ended December 30, 2023 totaled 72,484 million yen (up 9.4% year on year), mainly due to increases in sales across the entire Metering Business segment and certain power distribution equipment.

On the profit front, as is the case with net sales, a decline in profit for general plant projects and 3D inspection systems was more than offset by an increase in profit across the entire Metering Business segment and certain power distribution equipment. As a result, profit grew on every level, with operating profit reaching 5,320 million yen (up 41.6% year on year), ordinary profit 5,500 million yen (up 40.2% year on year), and profit attributable to owners of parent 3,337 million yen (up 31.0% year on year).

The operating results for each business segment are detailed below.

In the Electric Equipment business segment, net sales for the segment as a whole increased to 40,979 million yen (up 6.7% year on year) due to the increase in sales for certain power distribution equipment. Segment profit increased to 4,563 million yen (up 14.3% year on year) as well.

In the Metering Business segment, net sales for the segment as a whole rose to 22,463 million yen (up 11.7% year on year) due to increases in sales for replacement of expired meters and smart meters, with segment profit increasing to 3,540 million yen (up 80.5% year on year).

In the GX Solution Business segment, net sales for the segment as a whole increased to 6,204 million yen (up 61.9% year on year) due to a recovery process in sales volume for fast chargers from the impact of longer delivery lead times for parts procurement, and an increase in sales related to the data business, which was newly launched. Segment losses narrowed to 174 million yen (compared to segment loss of 640 million yen in the previous fiscal year).

In the Applied Optics Inspection System Business segment, sales of 3D inspection system decreased due to stagnating demand for semiconductors. As a result, net sales for the segment as a whole decreased to 2,106 million yen (down 32.4% year on year) and segment profit also decreased to 445 million yen (down 64.1% year on year).

In Other Businesses segment, a decline in real estate leasing revenue resulted in a decline in net sales for the segment as a whole to 731 million yen (down 2.4% year on year) and a contraction of segment profit to 489 million yen (down 1.3% year on year).

(2) Explanation of Financial Position

Total assets at the end of the third quarter under review increased by 3,059 million yen compared to the end of the previous fiscal year to 109,381 million yen. This was primarily due to increases in cash and deposits and inventories despite a decrease in notes and accounts receivable - trade, and contract assets.

Liabilities decreased by 103 million yen from the end of the previous fiscal year to 47,758 million yen. This was primarily due to increases in short-term borrowings, contract liabilities, and long-term borrowings despite decreases in notes and accounts payable - trade, income taxes payable, accrued consumption taxes, and

accounts payable - other.

Net assets increased by 3,162 million yen from the end of the previous fiscal year to 61,623 million yen. This was primarily due to an increase in retained earnings owing to the recording of profit attributable to owners of parent and an increase in non-controlling interests, despite decreases resulting from dividends paid and purchase of treasury shares.

(3) Explanation of Consolidated Financial Results Forecast and Other Forward-looking Information Regarding the full-year consolidated financial results forecast, we have made changes to the consolidated financial results forecast announced on April 26, 2023. For details, please refer to the "Notice of Revisions to Financial Results Forecast for the Fiscal Year Ending March 31, 2024" announced today (January 29, 2024).
