1. Qualitative Information on Quarterly Financial Results

(1) Explanation of Operating Results

In May 2023, we identified and then made a subsequent announcement of improper cases related to transformers (improper preparation of type test reports, improper labeling of country of origin, and preparation of false pre-shipment inspection reports). We would like to again express our deepest apologies to our customers, shareholders, and other stakeholders for any inconvenience and concern this may have caused. We have reconfigured the way we perform investigations based on analysis of factors that led to oversight in the full inspection performed in light of the previous instance of an improper case (matters pertaining to inspections of gas insulated switchgear discovered in August 2021), and are currently carrying out a comprehensive investigation on all products of the Company. Furthermore, we will investigate the direct cause of this incident and look to identify the root of the problem, which has remained unidentified and unaddressed for a long period. We will also evaluate the effectiveness of the recurrence prevention measures that are currently being implemented and consider and put in place any additional measures deemed necessary as a result of this investigation. Please also note the impact of this incident on the results for the six months ended September 30, 2023 is minimal.

Regarding the overall situation for the Group, the business environment is changing significantly and becoming increasingly severe in the electric power industry, which is our largest customer. Global fuel prices have risen rapidly due to the situation in Ukraine and competition has further intensified in the retail business amid growing demands for realizing carbon neutrality, ensuring stable electricity supply and demand, strengthening disaster prevention functions and resilience within local communities, and a revenue cap system—a new system for wheeling charges. Against this background, companies in the industry are working to improve productivity and thoroughly reduce business costs. Meanwhile, the Japanese government has declared its intention to become carbon neutral by 2050 as part of its efforts to realize a decarbonized society. In Japan, that has encouraged the further spread of distributed energy-related equipment, including renewable energy, and there are signs of nascent demand for fast chargers for electric vehicles.

In April 2021, the Group formulated its 2030 VISION and Medium-term Management Plan 2023. Based on the three pillar policies of deepening and transforming our core businesses, transforming the structure of our business foundations, and taking on challenges to cultivate the future vision for 2030, we have started pursuing an ambidextrous management style that strives to simultaneously transform existing businesses and develop new businesses, in order to achieve our 2030 VISION.

In August 2023, we revised the "Takaoka Toko Group Charter of Corporate Behavior" and established the "Human Rights Policy of Takaoka Toko Group ^{*1}" with the aim of further materializing and accelerating our efforts regarding "respect for human rights," one of the issues surrounding sustainability. Going forward, we plan to continuously implement human rights due diligence^{*2}. In line with the revision of the Charter of Corporate Behavior, we are reviewing the content of our sustainability initiatives^{*3}.

In September 2023, we published the Integrated Report 2023^{*4}. It provides an interview with the General Manager of the newly established Human Resource Development Center as part of our initiatives to become a comprehensive energy business provider, the aim set forth in our 2030 VISION (announced in April 2021), and a discussion meeting with Independent Outside Directors as a topic to reveal the effectiveness of the Board of Directors of the Company. In addition, we have enhanced disclosure of information, including the abovementioned "Human Rights Policy of Takaoka Toko Group," the implementation status of dialogue with shareholders, and the status of our response to the TCFD (Task Force on Climate-related Financial Disclosures), and have changed the name of the TAKAOKA TOKO REPORT through FY2022 to the Integrated Report. Its cover features "Paralym Art," which we sponsor to support the social participation and independence of disabled people.

We will continue to implement various initiatives to enhance communication with all of our stakeholders.

At the end of March 2023, the Tokyo Stock Exchange issued a notice titled, "Action to Implement Management that is Conscious of Cost of Capital and Stock Price." The situation for the Company with regard to this as of March 31, 2023 was as follows: ROE = 5.5%; PBR = 0.7x. The stock price, ROE and PBR has been on an improving trend relative to March 31, 2019 (ROE = 2.1%; PBR = 0.4x); however, they fall short of the standards detailed in the aforementioned notice and we fully acknowledge that there are still issues.

Going forward, we will begin by analyzing the current situation with reference to the content of the above notice (form an accurate understanding of the Company's capital costs and returns on capital, and analyze and evaluate the current situation with regard to this and the market evaluation at meetings of the Board of Directors), then formulate and disclose our plans.

As part of these efforts, we are analyzing metrics and identifying issues on a by business-segment or by model level, to improve initiatives focused on ROIC metrics toward the realization of business management and operations that take into account capital costs and return on capital.

Furthermore, in order to improve ROS, we will accelerate kaizen and DX initiatives while also engaging in structural reforms of existing core businesses (selection and centralization, reform of supply chains, reshuffling of production bases, etc.), formulating takeoff strategies for new businesses, investing in growth, and creating intangible assets through investment in human resource and R&D. Each of these shall be disclosed in the form of easy-to-follow growth stories and we will actively work on improving dialogue with our investors.

Despite a decline in sales for general plant projects and 3D inspection systems, net sales for the six months ended September 30, 2023 totaled 43,774 million yen (up 3.6% year on year), mainly due to increases in sales across the entire Metering Business segment and power distribution equipment.

On the profit front, despite the increases in sales for power distribution equipment and smart meters, these were not enough to cover the decreases in sales for general plant projects and 3D inspection systems, with operating profit totaling 2,253 million yen (down 2.1% year on year), ordinary profit decreasing to 2,406 million yen (down 3.4% year on year), and profit attributable to owners of parent decreasing to 1,442 million yen (down 11.0% year on year).

The operating results for each business segment are detailed below.

In the Electric Equipment business segment, net sales for the segment as a whole increased to 24,863 million yen (up 1.6% year on year) due to increases in sales for overseas construction projects and power distribution equipment, for which prices have been revised. However, this was not enough to cover the reduced sales for general plant projects, with segment profit decreasing to 2,358 million yen (down 5.6% year on year).

In the Metering Business segment, net sales for the segment as a whole rose to 13,954 million yen (up 8.7% year on year) due to increases in sales for replacement of expired meters and smart meters, for which prices have been revised, with segment profit increasing to 1,880 million yen (up 44.6% year on year).

In the GX Solution Business segment, net sales for the segment as a whole increased to 3,166 million yen (up 28.7% year on year) due to a recovery process in sales volume for fast chargers from the impact of longer delivery lead times for parts procurement, and an increase in sales related to the data business, which was newly launched. Segment losses narrowed to 339 million yen (compared to segment loss of 447 million yen in the previous fiscal year).

In the Applied Optics Inspection System Business segment, sales of 3D inspection system decreased due to

stagnating demand for semiconductors. As a result, net sales for the segment as a whole decreased to 1,302 million yen (down 33.2% year on year) and segment profit also decreased to 357 million yen (down 53.1% year on year).

In Other Businesses segment, a decline in real estate leasing revenue resulted in a decline in net sales for the segment as a whole to 488 million yen (down 3.6% year on year) and a contraction of segment profit to 329 million yen (down 4.6% year on year).

(2) Explanation of Financial Position

Total assets at the end of the second quarter under review decreased by 3,361 million yen compared to the end of the previous fiscal year to 102,961 million yen. This was primarily due to a decrease in notes and accounts receivable - trade, and contract assets despite an increase in inventories.

Liabilities decreased by 4,759 million yen from the end of the previous fiscal year to 43,103 million yen. This was primarily due to decreases in notes and accounts payable - trade, accrued consumption taxes, and income taxes payable, despite an increase in contract liabilities.

Net assets increased by 1,397 million yen from the end of the previous fiscal year to 59,858 million yen. This was primarily due to an increase in retained earnings owing to the recording of profit attributable to owners of parent and an increase in non-controlling interests, despite decreases resulting from dividends paid and purchase of treasury shares.

(3) Explanation of Consolidated Financial Results Forecast and Other Forward-looking Information Regarding the full-year consolidated financial results forecast, we have not made any changes to the consolidated financial results forecast announced on April 26, 2023.
