Notice of ISO 9001 Certification Renewal

We would like to inform you that our company had its ISO 9001 certification revoked by the Japan Electrical Safety & Environment Technology Laboratories (JET), the ISO certification body, on December 5, 2023, due to incidents of impropriety involving certain transformer products manufactured by our company.

Subsequently, on May 31, 2024, we successfully regained certification for the following business units: Electric Equipment, GX Solution, and Applied Optics Inspection System. Following an expanded audit by JET, we have now received official notification that the Power Equipment & System and Metering business divisions have also been successfully re-certified, as outlined below.

As a result, we have successfully reacquired ISO 9001 certification for all of our business segments. As the renewed Takaoka Toko, guided by the principle of “SQC First” — placing Safety, Quality, and Compliance as our highest priorities — we remain committed to continuously enhancing the quality of our products and services.

1. Business Segments Subject to Re-Certification

Power Equipment & System Business, Metering Business

(Note: Electric Equipment, GX Solution, and Applied Optics Inspection System businesses were re-certified as of May 31, 2024. With the re-certification of the above Power Equipment & System and Metering businesses, all of our business segments have now successfully obtained re-certification.)

2. Certification Standard

ISO 9001:2015

3. Certification Number

JET-0111

4. Date of Certification

July 15, 2025
